## UNIVERSAL ICE CHEST CARRIER

POLARIS MODELS ONLY USE THIS HARDWARE TO BOLT THE PLATE TO RACK.

MOUNT AS SHOWN HERE FOR THE TUBULAR RACKS SOME REAR RACKS ARE MADE DIFFERENT SO THE FLAT BRACKET MAY TURN EITHER WAY. USE THE CLIPS TO MOUNT THE PLATE TO THE REAR RACK. THEN USE THE BOLTS NUTS AND WASHERS TO BOLT THE ADJUSTMENT ARMS TO THE PLATE.

ALWAYS TRY TO PUT A CLIP ON THE VERY END OF THE PLATE TO ANCHOR THE PLATE FROM ROLLING BACK ONCE THE ICE CHEST IS IN PLACE.

ONCE YOU HAVE CHOSEN THE CHEST YOU WANT ADJUST THE ARMS TO CRADLE THE CHEST THEN SECURE IN PLACE WITH THE RATCHET STRAP..

SET THE BRACKETS AS PIC. IS SHOWN HERE FOR THE POLARIS MODELS. THE FLAT BRACKET MAY MOVE AROUND TO FIND HOLES TO BOLT IN ON THE COMPOSITE RACKS.
